

Daxko Accounting 2021 Tax Forms Update and Quick Edit of Vendor Status

Our first release of the year for Daxko Accounting (22.1) includes the necessary **updates to IRS Forms 1099-MISC, 1099-NEC, and 1096**. These forms will be available for you to print on Wednesday 1/12/22. We also included a new feature that will allow you to quickly edit vendor status and a design update to the chart of accounts page. We are excited for a big year for Daxko Accounting, stay tuned for more to come!

Quick Edit of Vendor Status

To update a vendor status, instead of navigating all the way into edit mode on a selected Vendor, their Active/Inactive status can be updated from the full vendor list. Simply click on the Active or Inactive text in the "Status" column and select the status! This was a commonly requested feature and we hope that it saves you valuable time.

Design Update to Chart of Accounts

To provide a similar experience that you will now find while managing vendors, we made design updates to the chart of accounts “Update Accounts” page. This page gives you the same functionality as before but with a easier to use experience.
