Area Rentals for Daxko Scheduling + Other Updates

This Daxko Operations release includes the exciting addition of **Area Rentals** to Live sites for associations using Daxko Scheduling. Be sure to read the full release notes below.

Plus, check out a few additional changes and updates also included in this release.

Area Rentals | Creating In-House for Daxko Scheduling Customers

Facility rentals are an appealing benefit for members and an exciting revenue opportunity for associations. With this release, creating Area Rentals through the in-house staff experience will be available on the Live site for associations using Daxko Scheduling. Read the full user guide <u>here</u>.

Updates to Display Program Information at Check-In

Last year, we started displaying program registration information on the <u>check-in</u> <u>screens</u>. With this release, when members receive the "Access Denied" on Rapid Check-in, staff will see program information details for any upcoming programs they're registered for.

Pages converted

We have made a few more updates to the technology we use for a couple program messages pages. The URL for these pages will be slightly different, and users may notice minor layout changes, but the page functionality has not been changed.

The pages that will be updated are the following:

- Programs > Program Messages
- Programs > Program Messages > Edit > Program Message Details

Note: If users have any of the above pages bookmarked in their browser, they will need to update the URL following this release. The old URL will no longer work.

Please contact support@daxko.com if you have any questions.
