# Assign Tasks for a Specific Date + More New Features

This release contains a few frequently requested enhancements, in addition to some small maintenance items and defect fixes. We will also be enabling a new icon-based content option in the email editor next week; details about that are included below.

Assign a Task to be due on a specific date

Users assigning one-off Tasks have requested more precision when setting a due date. With this release, all Engage users have the option to select a specific date that a Task should be completed by.

Additional timeframes for Member and Unit Visits Group Rules

Given how rapidly "normal" has been evolving these days, you might need to

segment facility visits by timeframes more recent than the past 2 weeks. Now, for the "Has visited…" and "Hasn't visited…" Group Rules, you can choose to segment by three new timeframes: 1 day, 3 days, 1 week

The above features will be available on **Friday, June 26**. [Read the full details here](#).
