August Updates to Daxko Mobile

This release contains one requested customer item and one update for those who will be switching from the Daxko Mobile Container app to the White Label app. This release will take effect on **Thursday, August 15th**.

Release Details

We have enhanced the search functionality in the Daxko Mobile app and also are helping ease the transition of customers to our new White Label App for Daxko Mobile. The highlights of the new look and feel include:

- When searching for your organization, members can now search by Branch and see what Association names are related to that branch.
- If your organization is switching to the White Label app, we have reminder text that will populate in the Container app to help inform members.

Access all of the details in this week's [User Guide](#).
