

Available March 20th! Wait Lists for Child Care Programs

Wait Lists for Child Care Programs

With our recent developments for child care and camp programs, we're aiming to make your 2019-2020 school year registration an efficient and simple experience.

For those registrations that come in after a child care program is full, **we now offer Wait Lists for Child Care programs!** This new feature is now available on your [live site](#) and requires setup from you and your team.

Check out all of the details in the [User Guide](#).

With this release, you can set capacity for both the before and after school care time slots, and Daxko Operations will appropriately track capacity by time of day. You can also create a wait list and move registrants to the roster as needed.

We designed our Child Care wait lists to mirror Camp wait lists, to make it easier to implement and use.

Email support@daxko.com with any questions.
