

Daxko Engage: End Date for Ongoing Initiatives + Locked Rows for Email Editor

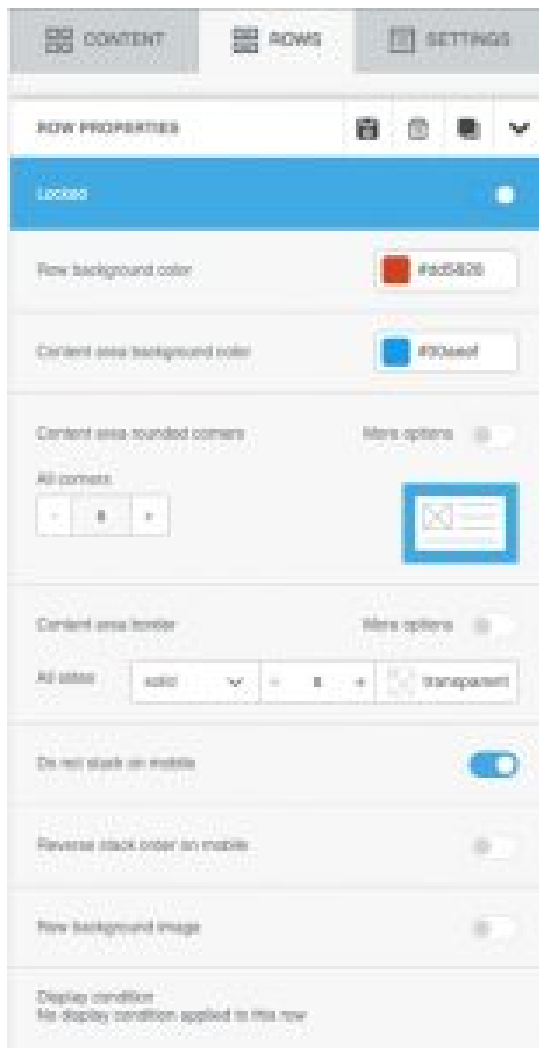

Ongoing Initiatives | Introducing End Dates

Based on customer feedback, we recognize there are instances when an ongoing initiative needs to end. With our latest release, you can now choose a future date for which an ongoing initiative will be marked completed. When the ongoing initiative reaches the end date, it will be marked as completed and no additional correspondence will be sent to anyone in that initiative.

Email Editor | Introducing Locked Rows

Administrators can now lock rows in the email editor. This enhancement is ideal for standardizing your headers and footers, giving you peace of mind that these rows cannot be modified by other user roles. When building an email, Administrators will see the “Low Rock” option at the very top of the ROWS Tab. To lock a row, simply click the toggle and you will see that ‘Locked’ is displayed in blue. By default, rows remain unlocked.

These updates will be available for all associations using Daxko Engage on **Wednesday, August 10**. Please contact support@daxko.com if you have any questions.

Project Thrive: “Ask the Expert” Sessions

The Daxko Team is offering a new webinar series called **Project Thrive**. During our “Ask the Expert” sessions, our team of product experts hold office hours to

cover the basics of Daxko solutions AND give you time to ask questions. We'll be offering new "Ask the Expert" sessions every week, so stay tuned for more...

Check out upcoming and past sessions [here](#).
