

Daxko Engage Release: No-Send Schedules for Initiatives

No-Send Schedules for Initiatives

Setting up automated initiatives can be a huge efficiency gain for associations using Daxko Engage, as well as a great way to ensure that members receive engagement touchpoints at appropriate times. However, we also understand that there are occasionally holidays and other special events when associations do not want emails or text messages to send to members or the community.

Because of this need, we are excited to release **No-Send Schedules**, periods during which communication from initiatives is paused for a short time and deferred until later. [Check out this User Guide to learn more.](#)

The screenshot displays the Daxko Engage user interface. At the top, a modal titled "Add No-Send Schedule" is open. It contains the following fields and options:

- Schedule Name:** A text input field with the value "Yom Kippur Observation".
- Starts:** A date input field with "10/04/2022", followed by "at" and a time dropdown menu showing "06:00 PM". To the right is a toggle switch for "All Day Event", which is currently turned off.
- Ends:** A date input field with "10/05/2022", followed by "at" and a time dropdown menu showing "06:00 PM".
- At the bottom of the modal are two buttons: "Nevermind" and "Add".

Below the modal, the main interface of Daxko Engage is visible. The header shows "Monroeville Area YMCA" and navigation links for Groups, Initiatives, Opportunities, Activity, and Reports. A search bar and the Daxko Engage logo are also present. The "Initiatives" section is active, showing a list of initiatives. The list has columns for NAME, RECURRENCE, SCHEDULED BY, SCHEDULED FOR, and STATUS. One initiative is listed: "Spring / Summer 2022 Special Events Newsletter" with a recurrence of "ONE-TIME", scheduled by "daxko developer", and scheduled for "3/18/2022 at 2:15 PM". The status is "Deferred", which is highlighted with a red box. Other actions available for this initiative are "Override", "Copy initiative", and "Unschedule".

No-Send Schedules will be available for all associations using Daxko Engage on **Tuesday, May 31**. Please contact support@daxko.com if you have any questions.

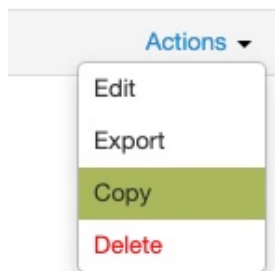

Other great updates in this release include:

1. Users can now send test emails from “Define Workflow” step to another

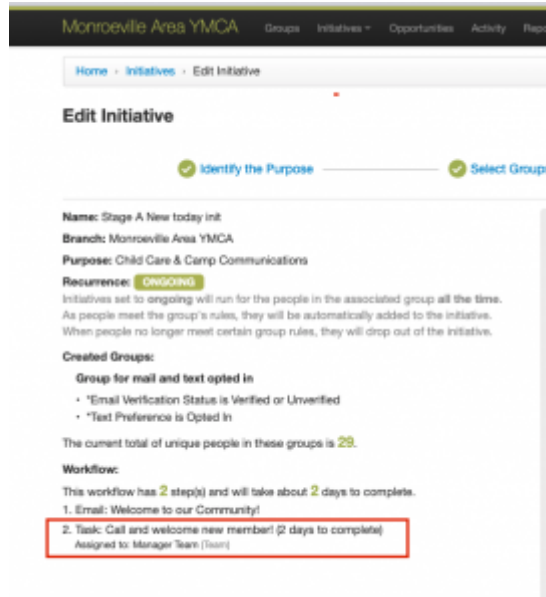

email address.

2. Engage Administrators and Marketing Managers can now copy a group.

3. In Step 4 (Review) of creating an Initiative, users can now see which user or team a task is assigned to in that workflow.

4. Membership ID has been added to Group Exports.
5. Custom Merge Fields are available with multiple imported group.

Project Thrive: “Ask the Expert” Sessions

Last week, the Daxko Team kicked off a new webinar series called **Project Thrive**. During our “Ask the Expert” sessions, our team of product experts hold office hours to cover the basics of Daxko solutions AND give you time to ask questions. We’ll be offering new “Ask the Expert” sessions every week, so stay tuned for more...

Check out upcoming and past sessions [here](#).
