

Daxko Mobile + GroupEx PRO Display Capacity

As many of our customers begin reopening at reduced capacity, it's more important than ever to limit the number of registrants who can sign up for classes.

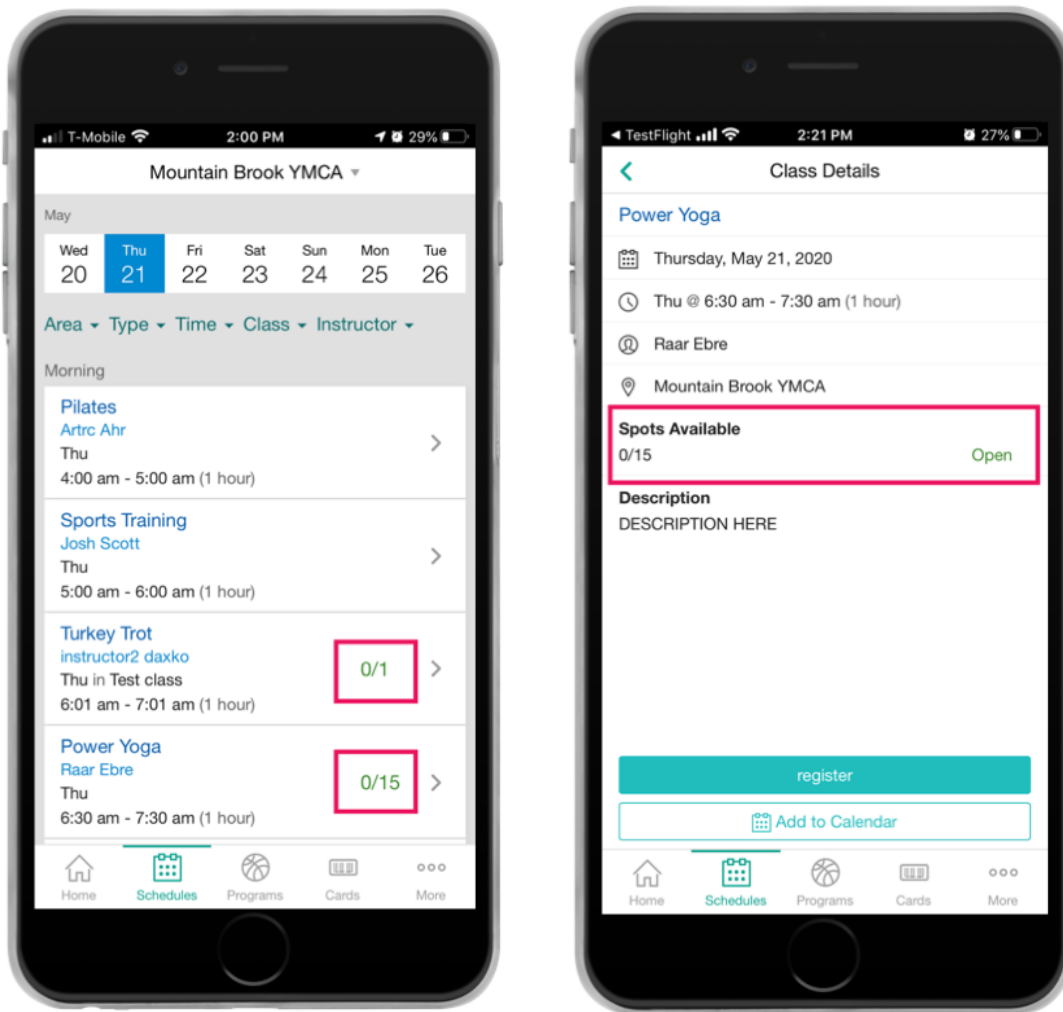

Now, **GroupEx PRO customers using Daxko Mobile for schedules** have new ways to manage this:

- display within the Daxko Mobile app which classes require reservation and what current capacity is, and
- provide a GroupEx PRO reservation link

Updated Schedules View to Show Capacity

With this release we have updated the Schedules view in the app. Now, users can tap on a class listing to view the full class details about that offering.

Also, if there is a capacity defined in the GroupEx PRO class configuration, the schedule view will display the **current capacity** of that class.

View Class Details, Spots Available and Registration Link

While viewing class details, the app user will now see a new **Spots Available** section beneath the other details. This will show how many spots out of the total available are still open. Selecting the **Register** button will direct the user to GroupEx PRO's online reservation process through the browser view of the app.

Read the full details [here](#). These enhancements for Daxko Mobile + GroupEx PRO customers are available **Thursday, May 21**, for app versions 11.6 or later. If you have questions, please contact support@daxko.com.
