Daxko Operations: Automated Sibling Discounts + a Look Ahead at Upcoming Releases

With this Daxko Operations release, we're introducing a simple way to automate **sibling discounts** for child care and camp programming. Early adopters have been using this functionality for several months, and we're excited to make that available for all organizations.

This release also includes and enhancement to the **GroupEx PRO + Daxko Operations integration**, along with a handful of fixed issues. These updates and enhancements will be available for all organizations on **Wednesday, November 7**.

Plus, be sure to check out some of the upcoming new features and enhancements coming later this year…

Automated Sibling Discounts

This release includes the ability to configure basic sibling discounts for child care & camp programs. We know associations have specific sibling discount rules that can be either automatic or a manually approved discount. We also understand that this initial release will not accommodate every scenario, so we will look to early users like you to know what we should add next.

In this first release, automated sibling discounts will be available for **online registrations for child care and camp programs only**. Registrations must occur in the **same cart checkout** for the **same program** for members in the **same membership**.

Check out the **user guide** here. Sibling Discount will be available in Live and Training sites for all organizations on **Wednesday, November 8**.

Syncing Member Updates Between Daxko Operations + GroupEx PRO

As more and more associations adopt the integration between Daxko Operations and GroupEx PRO, we're continuing to make that experience smoother for members and staff. With this release, updates made to member name and/or email address in Daxko Operations will automatically sync to GroupEx PRO.

Fixed Issues

- Fix to website redirect button on online giving receipt
- Fix for Collections Manager export for member-rate customers
- Fix for issue when attempting to adjust off org. balances en masses
- Fix for errors when saving Child Profile w/ "Gender Identity" question
- Fix for issue when waitlisted registrants not charged sales tax after moved to roster
- Fix to appropriately display updated pledge schedule dates

🎉 Coming soon...

The year may be winding down, but we've got a couple of exciting releases planned before 2023 is behind us. Stay tuned to the release blog for more info about the following features and enhancements:

Child care sub-rosters: expanding upon [camp sub-rosters](#), now users can group child care registrants by classroom, bus groups, activities and more!

Sales tax for area rentals: automatically charge sales tax for area rentals, much like you can for [standard programs](#) and [child care](#)

Enhancements to the Daxko Operations + GroupEx PRO integration: sync facility check-ins with group exercise attendance

New dashboards and KPIs: access data insights through new KPIs & dashboards, powered by the Daxko Data Labs team — at no extra cost!
