

# Daxko Operations: Introducing Sub-Rosters for Camp Programs + Update to Recently Viewed Members

Attention camp directors! We've got a more efficient way to manage your camp programs. With new **sub-rosters for camp**, you can create and manage groups within your camp rosters to help you and your campers stay organized.

Plus, we've listened to your feedback on the new **recently viewed members** update, and users will now have the ability to choose whether or not that section displays for them.

Read the blog below for the full details!

These new features and enhancements will be available in Live sites for all organizations on **Wednesday, May 10**.

---

## □ Group Camp Participants with Sub-Rosters

Attention camp directors! We know that managing camp programs does not end with a roster full of registrants. In fact, that is just the beginning. From bus groups, cabins, tribes, special activities, and more, there is a lot to get organized in time for camp. On top of that, camp programs might vary widely from one week to the next week and the new sub-rosters functionality is designed to help camp teams manage all of that.

We're excited to introduce built-in roster management functionality for more streamlined camp organization. Check out the [release guides here](#) for the full details.

❏ **Coming soon...** We're also working on sub-rosters for childcare programs. Be on the lookout later this summer for more details.

## Enhancements to Recently Viewed Members

Since the [release](#) of the new Recently Viewed Members section on the Member Search page, we've heard a lot of great feedback from users about how this feature simplifies their day-to-day processes when serving members. We have also heard from users who in some situations would like the ability to hide this feature. To accommodate the variety of needs for users of the Member Search page, we've enhanced the Recently Viewed section so that it is collapsible if necessary.
