

Daxko Operations Release: SMS Staff Alerts for Program Availability in Training Sites

SMS Staff Alerts for Program Availability: Now in Training Sites

To best serve your members and program participants, it is important for you to have real-time insight into program availability so that your team can act quickly to place someone from the waitlist into the program.

With this release, Program and Child Care staff can now be notified via SMS text notification any time an opening becomes available for a standard program or child care program with a waitlist enabled.

Read the [user guide here](#). This feature will be released to Training sites for all associations on **April 28**. We plan to release to Live sites for all associations on **May 11**.

Got Daxko Questions?

Join our first **Project Thrive: Ask the Expert** session on **Thursday, April 28**.

What's Project Thrive? Every week, our team of product experts will hold office hours to cover the basics of Daxko solutions AND give you time to ask questions.

In the first session, we'll be getting into the details of Reporting. We'll cover essentials like how to find the reports you value, how to build a custom report, and how to edit the existing reports you need.

Can't attend? Sign up so you can get the recording!

We'll offer new Ask the Expert sessions every week, so stay tuned for more...
