# Daxko Operations Release: Staff Actions to Send Barcodes, Online Instructor Bios + More

This Daxko Operations release includes a few new features and enhancements. Be sure to check out the user guides and details below!

- Staff Actions to Send Digital Barcodes
- Display Instructor Biographies Online
- Changes to Child Care Signature Report Rules

Staff Actions to Send Digital Barcodes

[Last year](#), we introduced new functionality that allows members to access their digital barcode through their online account and then add it to a digital wallet. With this release, staff users of Daxko Operations can send digital barcodes to members through a text message or email.

Display Instructor Biographies Online

Who the instructor is for a particular program offering is often an important factor for someone browsing programs. Now, instructors can choose to include their profile photo and a short biography to display online for program offerings.

Changes to Child Care Signature Report Rules

In order to ensure that child care signature reports download quickly and successfully, we have implemented additional rules for the filters on the Child Care Signature Report. If an association would like to pull the signature report for a program across **all locations**, the date range will be limited to a single week of signatures. If an association selects a **single location** for a program, the date range may extend to a month at a time.

All reports will continue to process in the reporting queue and downloads of those reports will be available in the Past Reports section of the Child Care Signature Report. **Note:** Changes have only been made to the filters section of the report. No changes have been made to the contents or layout of the report itself.

These features and enhancements will be available for users on **Wednesday, March 2**. Please contact support@daxko.com if you have any questions or concerns.
