

Daxko Operations: Upcoming Enhancements ☐

This week's Daxko Operations release includes a handful of minor updates, fixes, and maintenance items:

- Fix for issue on Unmatched Donation History
- Fix for "Oops" error when managing a branch with no users
- Fix for gift card account entries imbalance
- Improving the EMV transaction flow

Keep reading below to learn about some exciting updates coming soon!

Coming Soon ☐

In the coming weeks and months, we'll be rolling out several exciting new features and enhancements that you'll definitely want to be on the lookout for!

Trusted Screening: Guest Scans

Last year, we introduced [Trusted Screening](#), a new integrated, automated sex offender screening service in Daxko Operations through our partnership with Raptor Technologies. In an upcoming release, we will be expanding this functionality to include **individual and bulk guest scans**, helping to make your facilities even safer.

Daxko Scheduling: Facility Reservation Enhancements

As more and more organizations adopt **Daxko Scheduling** to support their facility reservations and area scheduling, we've been working on some meaningful enhancements that will improve the member experience and help you maximize your reservation offerings:

- Set up area rentals (now called **reservations**) to have a **maximum capacity** instead of being private or semi-private. For example, now you can book up to 50 individuals per hour at your ice rink!

- Allow reservations to specify which members are attending
- Collect waivers for reservations, online and in-house
- Improved online booking & calendar experience
- New reservation rosters and capacity reporting
- and more!

GroupEx PRO + Daxko Operations Integration: Member Eligibility

Users of GroupEx PRO will soon have a way to configure group exercise classes to allow or not allow nonmember reservations, giving you more flexibility around your offerings.

Child Profile Management

The new **Child Profile** provides a dedicated childcare profile that parents & guardians can access and update before, during, and after registrations. Early adopters who have been using the Child Profile have been able to streamline their childcare registration process by reducing the number of registration questions asked by up to **70%** while also allowing parents & guardians to update Child Profile questions before, during, and even after registration.

In an upcoming release, we will be making the Child Profile available in all Training sites, following by a Live site release a few weeks later.
