Edit Journal Entries and Net 45 in Daxko Accounting

With this release we are adding two exciting enhancements to Daxko Accounting.

Edit Journal Entries

The tasks to complete in a day can sometimes feel endless. It may seem even more daunting when a simple mistake takes manual and repetitive correction. We are adding the ability for users to correct a mistake in a posted journal entry with a simple edit to ensure accuracy and save time.

Net 45

When creating invoices, the most commonly used industry payment terms are Net 30, Net 45, and Net 60 days. In order to offer greater flexibility for best practices for our Daxko Accounting users, Net 45 is now a payment term option for creating invoices as well as invoice templates.

To read more about each change, please refer to our User Guide.
