

Happy 2022! Daxko Engage Release Update

Happy New Year! For our first release of 2022, we have a small handful of enhancements that were submitted and requested by users like you.

- Sending test emails to multiple people
- Updates to test email subject line
- Viewing test emails as web pages
- Plus a few small maintenance items or bug fixes

Sending test emails to multiple people

With this release, Daxko Engage users creating emails can now send test emails to other email addresses in addition to their own. By default, users will see their own email address but can choose to select others if needed. When adding other email addresses, simply **separate the email addresses by commas with no spaces in between**.

A screenshot of a web application dialog box titled "Send Test" with a close button (X) in the top right corner. The dialog contains a label "Send a test Email to: *". Below this label are two checked checkboxes: "Me (developer@daxko.com)" and "Others". Under the "Others" checkbox is a text input field containing the email addresses "membership@daxko.com,childcare@daxko.coi". At the bottom right of the dialog are two buttons: "Nevermind" and "Send".

Send Test

Send a test Email to: *

☒ Me (developer@daxko.com)

☒ Others

membership@daxko.com,childcare@daxko.coi

Nevermind Send

Updates to test email subject line

Test emails are now more clearly marked as such. With this release, the subject line for test emails will all begin with **"Test Send"** followed by the subject line.

Viewing test emails as web pages

Finally, because we heard from users that viewing emails as web pages is helpful in the testing and review process, we have added the ability to test emails that are part of one-time initiatives.

These features will be available for users on **Thursday, January 20**. Please contact support@daxko.com if you have any questions or concerns.
