

# Introducing the Daxko Attendance Tracker

Your facility is busy! You need secure and accurate child care check in for your parents and your staff. Our team has created a new experience to empower your child care and camp staff.

## ***What is the Attendance Tracker?***

The Attendance Tracker is a responsive web application and is accessible from most recent versions of tablets. It is not an application for iOS and Android that needs to be downloaded. Creating this experience in this way allows us to provide updates and features while maintaining a simple and pleasing experience for staff and members alike.

The Attendance Tracker will not eliminate the Roll Call iOS application.

## ***What will this experience include?***

The new experience will include many new and exciting features that are not currently available in the Roll Call application. The list includes features such as:

- Two Modes – Staff and Parent
- Training site available for educating staff
- Show both date of birth and age
- Display rate plans for registrants
- Check in by site across all programs
- Include days selected for applicable registrants

For full documentation, access the [User Guide](#).
