# Updates to Child Care, Camp, and Discount Group Rules

This release includes additional enhancements to registration Group Rules, similar to updates we made with our May 15 release. Also included is an enhancement to the Discount Group Rule, plus a few minor maintenance items and bug fixes.

Group Child Care and Camp Registrations By Time Frame and Currently on Roster

Similar to the enhancements we made with our May 15 release ([review those notes here](#)), you can now group by child care and camp registrations that occurred within a specific time frame as well as by registrants who are still on the roster.

Group By Discount Groups Currently Applied

When using the With Discount Group Rule, you can now choose to include people who **have ever** had the selected discount groups or people **who currently have** the groups applied.

Read more details about these Group Rule enhancements [here](#). These will be

available on **Friday, June 5**. If you have questions, please reach out to support@daxko.com.
