

New Login Experience to Live Site

This release contains exciting changes to the Online Login member experience that we added to your Daxko Operations Training Site on June 10th. This release will be added to your Live Site tomorrow, **Wednesday, June 24th**.

This new experience includes:

- Mobile first design
- Log in with email address or phone number
- Keep Me Logged In option
- Quick Login with a One-Time Code
- Duplicate email resolution

... and more! Check out this release's [User Guide](#). It includes steps for users to try out online functionality on the Training Site if users wish to try out this new feature or troubleshoot an issue for a member.

This release also includes a few smaller updates:

- Agreements requiring signature for facility usage may now be saved as a new draft and changed to remove requiring a signature and published
- Prospecting notes prior to our May prospecting release were not showing. This will be resolved with this release.
