

Rate Plan Report Added to Daxko Operations

In the last year we have placed a heavy focus on child care and camp enhancements to allow for efficient and user-friendly setup and management of programs. This release contains a new report that many of you have requested - a Rate Plan Report! This will be available to all customers on Wednesday, August 7th.

Rate Plan Report

This new report is located in the Child Care module and will export all of the setup details for rate plans using a set of filters. This report is valuable for:

- Staff audits to ensure proper data entry and setup
- Research of rate plan configuration
- Monitoring rate and availability exceptions

For all of the details on what is included in the report, access this week's [User Guide](#).
