

# Updates for Custom Reports

This release contains an upgrade for custom reporting in Daxko Accounting, available to all Daxko Accounting users on **Wednesday, August 14th**.

## ***Release Details***

The building of custom reports is getting an update! The new experience is more intuitive, without losing any existing functionality previously available to users. The highlights of the new look and feel include:

- Full screen display
- Improved text display
- Quick access for primary actions
- Visual indication of progress
- New report templates

With these updates, please be reassured that scheduled subscriptions, user permissions, existing reports, and folder structure will not be lost. The custom reporting experience for Daxko Operations was also updated in May.

Access all of the details in this week's [User Guide](#). We have also updated self-paced training for Custom Reports with the latest upgrade. You may access it [HERE](#) and it requires your login for the Daxko Help Center.
