

Allow Admins to designate multiple branches for Standard Users in Daxko Mobile and more...

This new Daxko Mobile release includes new ways to assign user permissions. Read the full release details [here](#).

New Permission Assignments

We have heard from you, our Daxko Mobile partners, that you need more flexibility with the way you are able to assign staff to branches as standard users.

Previously, you either had to assign a standard user to one branch or all branches. This release gives Daxko Mobile Administrators the ability to assign users to multiple branches without having to assign them permission to all.

Other Items in this Release:

- Adding Instagram as an option for Social Media
- We fixed a defect that displayed the incorrect date on scheduled notifications, banners, and announcements.

The above changes will take effect on Tuesday, **9/17**. To read all the details, check out the [release notes](#).
